## Summary

Hi there! My name is Nanda Kumaran G, and I am class 12 ( PCM) student with a passion for technology and security. I am excited to share that I am interested in pursuing a career in cyber security, and I am actively seeking opportunities to further my education in this field.

As technology continues to evolve, the importance of cyber security has never been more critical. With the increasing number of cyber threats and attacks, I believe that it is essential to have experts who are knowledgeable and skilled in protecting information and systems from potential breaches.

I am interested in studying cyber security because I am fascinated by the intricacies of how technology can be used to protect and defend against threats. Additionally, I am keen to learn about the legal, ethical, and policy considerations involved in the field, which I believe will be important for any future career in this industry.

I am currently exploring various educational opportunities in cyber security, such as degree programs, online courses, and certifications. I am particularly interested in programs that offer hands-on experience and opportunities to work on real-world projects, as I believe that this will help me develop the skills and knowledge necessary to succeed in this field.

If you have any advice, insights, or recommendations on how to pursue a career in cyber security, I would love to hear from you. Please feel free to reach out to me, and thank you for your time and consideration.
